

An Innovative Concept for Adding Privacy to Doors and Windows

Air Louver's Velo Privacy Screen™ is a cost-effective system to add privacy to doors and windows blocking all light and vision.

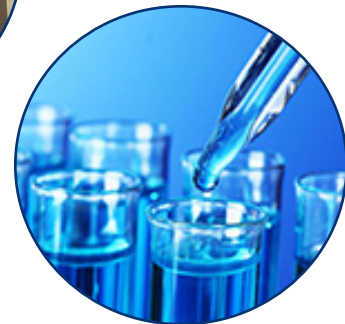

Velo Privacy Screen Key Benefits:

- Fits all manufacturer's vision lites
- Pulls down for privacy and retracts with a push of a button
- Maximum size has been increased to fit half-light size of 30" x 36"
- Less expensive than vision kits with mini-blinds encased in glass
- Installation takes minutes
- Tested to 10,000 cycles
- Patent-Pending
- UL-Listed for use on up to 90 min. doors

For Use on Fire-Rated and Non-Rated Doors and Windows

- Educational Facilities
- Hospitals and Clinics
- Conference Rooms
- Laboratories
- Warehouses
- Offices
- New Design Available for Sidelites

CONSTRUCTION PRODUCTS GROUP

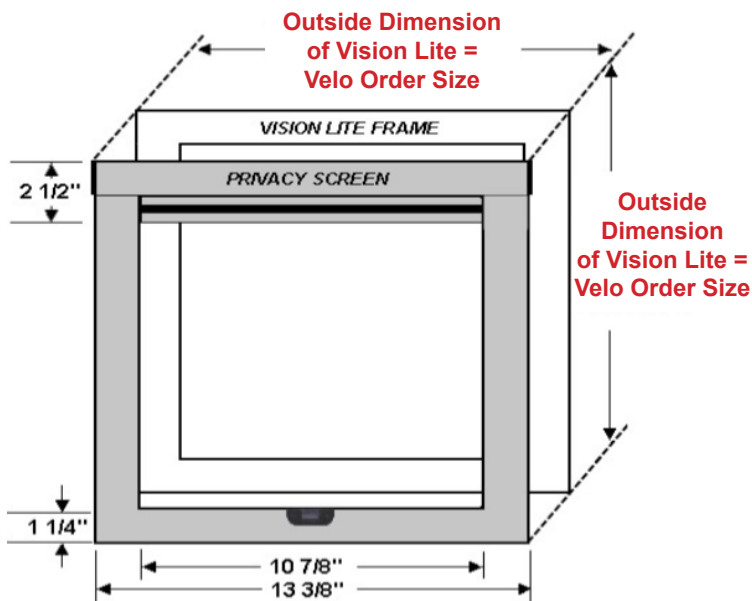

Air Louver's Velo Privacy Screen Completely Blocks all Light and Vision

Construction:	Aluminum 1-1/4" x 1/4" frame on 4 sides with radius corners, mitered and welded. 7/8" deep slots on both sides do not allow any light to penetrate—even on the edges. See product data sheet for full details.
Roller:	A spring-operated roller in an aluminum housing allows for controlled opening and closing of the unit. Push-button retraction quickly and easily retracts the shade. Tested to 10,000 cycles.
Shade:	A durable 100% opaque black, light-blocking fabric material, attached to a rigid pull-down bar mounted into the side channels. The shade latches into place when pulled down and retracts when the rocker switch is pushed.
Powder Coat Finishes for Frame:	Standard color is Mineral Bronze or can be ordered in any of our 12 colors options. See website to view selection. We do not recommend field painting of this product.
Sizes:	UL Listed Size: Minimum 13" x 13" or 169 in ² , Maximum 31 3/8" x 37 3/8". Non-UL Minimum Size: 5" W x 7" H. Order in any size in 1/8" increments.
Installation	Attach to installed vision lite using 1/2" wide 3M Dual Lock™ fasteners provided. Thickness of the vision lite or construction material does not matter as long as there is a flat 5/8" frame on which to mount the privacy screen.
UL-Listing 90 Min:	Tested under UL10C to maintain existing door, vision kit and glazing ratings up to 90 minutes for: Steel and wood doors, both temp-rise and non temp-rise. Velo Privacy Screen must be attached to a metal vision frame kit, not to the door itself, wood vision frame kits or to wood stops. See File # R38628.

SEE OUR WEBSITE FOR THE MOST CURRENT INFORMATION - WWW.ACTIVARCPG.COM/AIR-LOUVERS/PRODUCT/PRIVACY-SCREEN-VISION-LITES-PS

ORDERING:

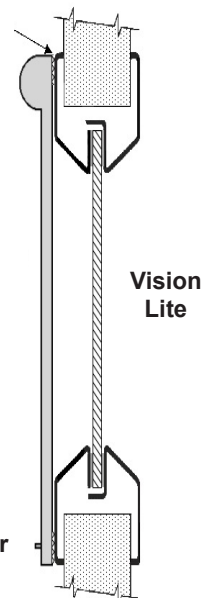

- THE MOST IMPORTANT THING TO CONSIDER WHEN ORDERING IS VISION FRAME SIZE.
- MEASURE YOUR OUTSIDE FRAME DIMENSIONS.
- THE OUTSIDE DIMENSIONS OF THE PRIVACY SCREEN SHOULD BE EQUAL TO THE SIZE OF YOUR VISION FRAME TO HAVE A PROFESSIONAL-LOOKING INSTALLATION.

Push-button Retraction

3M Dual Lock™ Attachment
