Air Louver's Privacy Screen Completely Blocks all Light and Vision

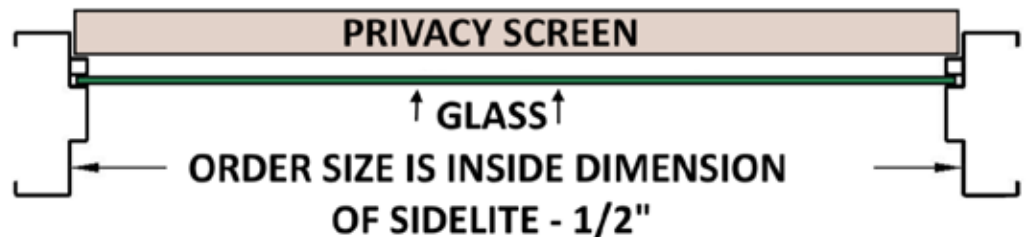

Construction:	Aluminum 1-1/4" x 1/4" frame on 4 sides with radius corners, mitered and welded. 7/8" deep slots on top and bottom do not allow any light to penetrate—even on the edges. See product data sheet for full details.
Roller:	A spring-operated roller in an aluminum housing allows for controlled opening and closing of the unit. Push-button retraction quickly and easily retracts the shade. Tested to 10,000 cycles.
Shade:	A durable 100% opaque black, light blocking fabric material, attached to a rigid pull-down bar mounted into the side channels. The shade latches into place when pulled down and retracts when the rocker switch is pushed.
Powder Coat Finishes for Frame:	Standard color is Mineral Bronze or can be ordered in any of our 12 colors options. See website to view selection. We do not recommend field painting of this product.
Sizes:	Minimum 7" wide x 10" high, Maximum 22" wide x 88" high. Order in any size in 1/8" increments.
Installation	Attach to 5/8" glazing stop or face of hollow metal frame using fasteners provided.

SEE OUR WEBSITE FOR THE MOST CURRENT INFORMATION - WWW.ACTIVARCPG.COM/AIR-LOUVERS/PRODUCT/PRIVACY-SCREEN-VISION-LITES-PSL

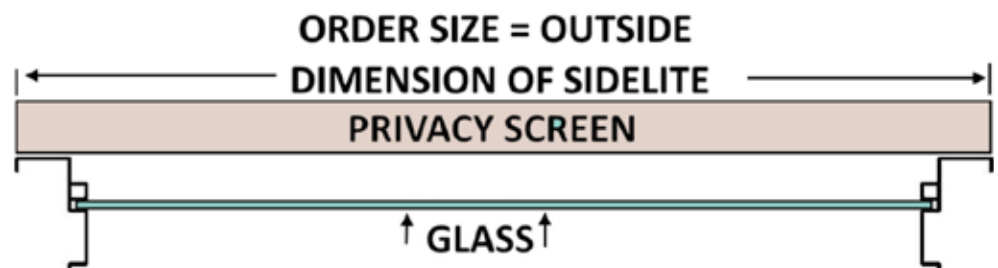

Mounting Option # 1:

Measure inside dimension and size to be installed on glazing stops on room side. Deduct 1/2" on H & W to assure fit.

Mounting Option #2:

Measure outside dimension of sidelite and size to cover the sidelite frame on the room side.
